Scoring at a glance

- Card values: ace 15, but an ace played low in A-2-3 counts 1. Tens and face cards 10. Twos to nines count their number.
- When someone goes out (or the stock runs out), add the cards you melded or laid off and subtract the cards left in your hand.
- Your hand score and your total can both go below zero.
- First to 500 or more wins. If two players pass 500 on the same hand, the higher score wins. A tie plays another hand.
